DS/U/MPS | Satin resin-coated inkjet photo paper 200gsm - 1270mm x 30m (1 Roll Box)

A photo paper for all projects, our MPS product has the ideal quality for everyday printing. It's fairly substantial at 202gsm, and has some rather premium features including a microporous resin coating and a water-resistant finish. Prints look remarkably sharp and vivid with this paper, plus there's a stunning satin sheen that makes it ideal for all manner of photo projects.

This premium photo paper is the perfect choice for premium photo cards, presentation prints, portraits and posters where a more substantial premium product is required.

Product Features

Its satin finish is the perfect finish for a premium look

Microporous resin coating for beautiful colour reproduction

Highly opaque design for strong print quality

Impressive lay-flat performance

Water-resistant finish for enhanced durability

High lightfastness gives longer-lasting results

Suitable for hot and cold lamination
