NEW	Silver	SPC-0443Si	

- Silver ink is used in 8 colour mode C M Y K Lc Lm W Si
- Please shake white and silver ink cartridge before each use in order to loosen the respective ink particles
- Please note that weather and scratch resistance is lower for white and silver ink. Therefore, lamination is strongly recommended for both outdoor and indoor printings.

New generation RIP software with 16-bit rendering

RasterLink Pro5 SG

For easy operation

Silver ink can be selected from the pre-prepared colour library. Just chose the respective colour and produce stunning prints.

For professional use

Produce delicate and brilliant colour prints with metallic inks. Choose your colours from the feature chart to print beautiful images.

ES3 Ink

Eco-solvent ink can be used safely in general office environments and does not require special ventilation equipment.

White Ink

When printing on transparent or coloured substrates, white ink underprinting enables printing or more vivid colours.

Silver Ink

Shining silver colour gives your prints a metallic appearance. In combination with standard full colours, bronze and gold and other metallic colours can be printed, resulting in stunning effects your customer will love
