HP Designjet Z-series printers – certified third-party RIPs

Our RIP certification program defines a comprehensive set of compatibility criteria aligned to the highest performance standards and the unique capabilities of HP Designjet printers. Only third-party companies that have demonstrated conformance with these criteria are awarded HP Designjet certified status.

HP has certified the following third-party Raster Image Processors, enabling additional control over elements such as color management, ICC profile management, tiling and nesting, support of multiple printers and optimizing Pantone and spot color.
